Saad Al-Tamari AI Specialist and Trainer

saadaltamari@gmail.com | Saad Altamari | Saadtamari | +962776353378 | Amman, Jordan

ABOUT

AI Specialist and Trainer with **4+ years** of experience delivering **15+ production AI projects** across mobile, web, and backend. Architected an AI platform spanning **350+ agents and 35+ applications**, while training and mentoring **70+ trainees**, onboarding **350+ professionals**, and creating technical learning resources used by **1,500+ learners**. Winner of **15+ local and global awards**.

EXPERIENCE

AI Operations Manager, Decasonic 12/2025 – 09/2026
Remote - USA

- Led and Built Decasonic's entire AI infrastructure from scratch, architecting a centralized system spanning **350+ AI agents across 35+ applications**
- **Achieved 100% automated** fault monitoring and **full centralized control** across the agent fleet by designing and building the Agent Control Panel
- Built the MCP Hub, a centralized gateway managing database read/write access for **35+ applications**
- Designed and built the central data architecture powering the **organization's AI-native infrastructure**, integrating graph, relational, and document databases.
- **Personally built 10+ of the AI-native apps** in the ecosystem, spanning core infrastructure tooling and business facing products & onboarded the team on them.

Data Science & AI Instructor, Elite Excellence Academy 09/2025 – 12/2025
Amman, Jordan

- Designed & delivered diplomas in AI & Data Science and BI & Data Analysis.
- Mentored **25+ students**, boosting technical skills and career readiness.
- Built tracking systems for leads, conversions, payments, and student progress.

Co-Founder & AI Engineer, SKAI Group 01/2025 – Present
Jordan

- Co-founded SKAI Group, an AI-native studio delivering production AI Native product, scaling scope to budget, never quality.
- Built and delivered AI-native applications and AI transformation solutions to clients across education, healthcare, and logistics, deploying them on **AWS** and **Cloudflare**
- Generated and personally met **30+** qualified leads in-person across diverse sectors, including Education, Medical, Logistics, Fintech, and Translation.
- Led business strategy, scaling model, and internal team structure from founding

Bader Wa Sahem

> **Head of IT** 02/2025 – 01/2026
> Jordan
>
> - Led IT for Bader Wa Sahem and its **4 sub-organizations** as Head of IT.
> - Built and managed an **18 person, 2 team** IT department from the ground up.
> - Designed the organization's AI and technology transformation roadmap.
> - Designed a white-label strategy and business development plan, including a roadmap for **5 site migrations, 5 e-learning academies, and 6 AI systems**.
>
> **Information Technology Lead** 04/2024 – 02/2025
> Jordan
>
> - Led IT initiatives at Next Step, driving business growth and digital transformation.
> - Automated event management,cutting manual tasks **85%** across **1.2K+** attendees
> - Built and Launched AI-powered LinkedIn Clinics (LLMs, Streamlit), demoed to real students.

Data Science and AI Mentor, SHAI For AI 02/2024 – 12/2024
Remote

- Mentored **35+ trainees** through E2E AI projects in EDA, ML, and AI implementation
- Reviewed capstone projects and provided technical feedback to improve quality
- Simplified complex AI concepts for diverse backgrounds, ensuring practical application

Machine Learning Instructor, ZINC YU 07/2023 – 01/2024
Irbid, Jordan

- Founded and grew an universities wide ML community to **300+ active members**.

- Taught ML fundamentals to students from various backgrounds.

EDUCATION

Yarmouk University, Data Science & Artificial Intelligence 09/2021 – 08/2025
GPA: 85 (**Excellent**), Participated in **25+** competitions, **earning 15+ awards** . Irbid, Jordan

PROJECTS

MCP Hub, Centralized data access layer for 35+ AI-native applications
Tech: Python, Next.js 14, TypeScript, Supabase (PostgreSQL), REST gateway, RBAC, Microservices
- Architected a single least-privilege gateway serving 35+ applications with table- and column-level access control, eliminating distributed database credentials entirely
- Built semantic schema introspection where human-written table descriptions feed the code generator, so generated integrations understand data meaning, not just structure
- Shipped real-time logging, per-app rate limiting, and automatic constraint-error translation, turning opaque database failures into actionable diagnostics

Agent Control Panel, Observability and control plane for 350+ production AI agents
Tech: Python, React 18, Express 5, PostgreSQL, Drizzle ORM, TypeScript, Microservices, HMAC-signed webhooks
- Instrumented 350+ agents across 35+ apps with rolling health scores, per-agent cost aggregation, and full run-level tracing, including the platform's own internal AI, made recursively observable under the same machinery
- Engineered remote behavior control via HMAC-signed webhooks with backoff retry, prompts, models, and lifecycle commands push into live production apps with zero redeploys
- Built prompt versioning with one-click rollback, LLM-as-judge quality scoring, and automated failure triage that explains and resolves errored runs

Web3 Investor Day App, AI-native event platform, live for 300+ attendees
Tech: Expo (React Native), React 19, Express 5, PostgreSQL, Drizzle ORM, TypeScript, MCP, OpenAPI/Orval
- Built an AI-native platform where an MCP-connected assistant answers any query across attendees, sessions, companies, and logistics from live, privacy-filtered context
- Engineered a deterministic matching engine, colleague exclusion via domain normalization, per-company caps, starvation floors, learned preference signals, with the LLM writing only the human-readable rationale
- Delivered mobile app, admin console, and API from a single OpenAPI contract, with server-side identity masking across every surface including AI prompts, 188 unit tests

Top Awards :
- **2025**: HAAC **- 1st on Jordan ||** Datadrip Hackathon - **2nd Place in the Arab World ||** Global Student Research Hackathon – **Top 7% Worldwide**
- **2024 :** NASA Space Apps Challenge Amman – **Best Strategy Team ||** GazaThon – **Best Sustainable Project ||** Jordan Entrepreneurship Competition (JEC) – **Top 7 on Jordan ||** Orange Coding Academy Competition – **1st on Jordan ||** Generative AI Hackathon - **3rd place on Jordan ||** Nutrition Entrepreneurship Technical Competition (NETC) - **3rd place on Jordan**
- **2023 :** Ahli Fintech Hackathon - **Top 10 on Jordan ||** AIO (Artificial Intelligence Olympiad) - **1st on the Arabic world**

SKILLS

Engineering — Python, TypeScript, JavaScript, SQL, Node.js, Express, React, React Native (Expo), Next.js, FastAPI, PostgreSQL, Supabase, Drizzle ORM, REST APIs, OpenAPI, Microservices, Multi-Tenant Architecture, RBAC, System Architecture, Unit Testing, Git and GitHub, CI/CD, AWS, Cloudflare, Application Security, Infrastructure Design, Docker, Prisma, Load Balancer, Claude Eco-system, Claude Code, Claude Co-work, Claude Design.

AI Systems — Data Preparation, Data Visualisation, Machine Learning, Deep Learning, MLOps, Large Language Models (LLMs), Multi-Agent Systems, AI Agent Orchestration, Retrieval-Augmented Generation (RAG), Prompt Engineering, Context Engineering, Harness Engineering, Loop Engineering, Model Context Protocol (MCP), LangChain, LangGraph, LLM Observability & Evaluation, Vector Databases & Embeddings, pgvector, Huggingface

Leadership & Business — Technical Team Leadership, AI Strategy & Roadmap, Cross-Functional Collaboration, Stakeholder Management, Business Development, Entrepreneurship, Business Analysis, Requirements Analysis, Teamwork, Work under Pressure, Analytical Thinking , Sales, Problem Solving, Teaching, Training, Onboarding
